PROFILE

Motivated and determined computer science student with a strong passion for data analysis, seeking an opportunity to further develop my technical skills. Passionate about extracting actionable insights from complex data sets. Strong problem-solving and critical-thinking abilities, coupled with immersive team-leading potential.

EDUCATION

Bachelor of engineering in computer science and engineering

sri Venkateshwara college of engineering chennai India

(2022 - 2025)

CGPA 8.290

Diploma in Electronics and communication engineering

S A polytechnic college , chennai india

(2019-2022)

CGPA 9.200

WORK EXPERIENCE August 2023–September 2023

INTERNSHIP IN WEB DEVELOPMENT –INTERNSHALA

- Completed 60days web development internship, focusing on learning HTML,CSS, and Javascript for website creation.
- Developed and maintained web applications using PHP, javaScript,HTML5, CSS3, MySQL database.
- Designed user interface elements such as button, forms, menus, and navigation bars
- Implemented front –end features to improve user experience

Certificate: Acknowledge with a certificate for performance and successful completion of the internship

SKILLS

- **Technical** Java , python , Database (SQL), Data Analysis, Statistics, data visualization
- **Tools** Canvas, android studio, Excel ,Mysql
- **Soft skill** Leadership ,Communication, Critical-thinking ,Problem solving

PROJECT

• **E-commerce sales Insights (june 24–july24)**

Objective: Analyze sales data to identify trends and insights for optimizing marketing strategies.

Description: Utilize a dataset containing sales records from an e-commerce platform. Clean and preprocess the data using Python libraries like Pandas and NumPy. Perform exploratory data analysis (EDA) to uncover patterns in sales, customer demographics, and product performance. Use visualization tools such as Matplotlib and Seaborn to present findings. Provide actionable recommendations based on insights to improve sales performance and customer engagement.

• **Hospital management system(mar23–April23)**

A hospital management system with integrated data analysis capabilities helps streamline operations by managing patient records, scheduling appointments, and optimizing resource allocation. Data analysis enables insights into patient demographics, treatment efficacy, and operational efficiency, enhancing decision-making for improved healthcare delivery.
