

A CHARAN KUMAR

BE - ELECTRONICS AND COMMUNICATION ENGINEER | FINAL YEAR

PROFESSIONAL SUMMARY

I am a Final-year B.E ECE student with a keen interest in the Electronics domain. I have an intermediate proficiency in Verilog HDL, Python, and C, and I possess good knowledge in digital electronics. I have a special interest in the VLSI domain. My problem-solving, leadership, and communication skills are well-developed, and I am passionate about leveraging technology to tackle challenges effectively. I am committed to continuous growth in the field of electronics and communication engineering.

RELEVANT SKILLS

- ✓ Fundamentals in Digital Electronics
- ✓ Embedded Systems
- ✓ Programming in python
- ✓ Verilog HDL
- ✓ Programming in C
- ✓ Arduino
- ✓ Llinux
- ✓ 4NCE2 Antenna Design & Simulation Software

CERTIFICATIONS

NPTEL

- Completed NPTEL Certification on " Joy of Computing Using Python" by Prof. Sudarshan Iyengar IIT Ropar
- Completed NPTEL Certification on "Introduction to Embedded Systems" by Prof.Dhananjay V.Gadre, Prof.Badri Subudhi IIT Jammu.

INFOSYS SPRINGBOARD

- Completed Online Digital Electronics Course in Infosys SpringBoard,
- Completed Online VLSI Digital Design and Verilog Programming course in Infosys Springboard.

RELEVANT WORKSHOPS

- Workshop on System Verilog for Digital Design Basics of Verification, Simulation and Debug held at IIIT Design and Manufacturing, Kancheepuram.
- IOT and Embedded system Workshop held at Chennai Institute of Technology.
- Ham Radio Workshop held at Sri Venkateswara College of Engineering.

INTERNSHIP

- During my internship at the National Atmospheric Research Laboratory at Gadanki, I conducted research on MST radar. My work specialized in the design and simulation of MST radar using the 4nec2 software.

RELEVANT PROJECT

- Ultron Device utilizes a 360-degree rotatable camera module, armed with a YOLOv5-based ML model trained on a diverse dataset of 2000+ pest images collected from Roboflow and Kaggle. When pests are detected, automatic pest spray and our bespoke ultrasonic sound generator kick in.
- I have completed a project on AHB2APB bridge design using Verilog HDL during my online VLSI Design internship project program in Maven silicon Institute.

EDUCATION

2021 - 2025 | Sri Venkateswara College of Engineering

CGPA : 7.932|GPA=8

2019 - 2021 | Accord School

SCORE: 94%

2019 | B.V Reddy Senior Secondary School

SCORE: 91%

LANGUAGE: • English - Professional Proficiency • Tamil - Native Proficiency • Telugu
