EXPERIENCE

Internship .	Jun 2023 - Jul 2023 <i>Cuddalore</i>
------------------------	---

BSNL : Skilled in optic fiber implementation for telecommunications, with comprehensive knowledge of signal transmission, BTS operations, and mobile call signaling.

PROJECTS

Gesture based Home Automation Controlling Smart home devices through hand or body gestures rather than traditional methods like switches, remotes, or voice commands. This system interprets specific gestures as commands, making interactions with home devices more intuitive and accessible.

Attendance Management System using Image processing -is an automated solution to mark attendance by recognizing faces in real-time or from captured images. This system utilizes image processing techniques and machine learning algorithms to identify individuals based on facial recognition, eliminating the need for manual attendance marking.
