PRINCE RAJ

CYBERSECURITY ENTHUSIAST AND RESEARCHER

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Sri Venkateswara College Of Engineering, Sriperumbudur, Chennai.

Duration: 2023 – 2027

Currently pursuing Bachelor's in Engineering with a focus on Cybersecurity, Software Development, Problem Solving, Artificial Intelligence & Machine Learning With Internet Of Things.

SKILLS

Cybersecurity – Ethical Hacking

Backend Development

Machine Learning

Internet of Things

Problem Solving

CODING SKILLS

Languages And Tools

- Python
- C & C++
- SQL
- HTML/CSS
- Java & Javascript

Frameworks & Technologies

TensorFlow, Keras, PyTorch, OpenCV, Flask, Arduino, Raspberry Pi

Tools & Platforms

Wireshark, Metasploit, Git, Postman, MySQL, MongoDB, Firebase, NMAP, Linux (Ricing And Customization).

PROFILE

A highly motivated B.E. Computer Science and Engineering student with a strong passion for Cybersecurity, Software Development, Artificial Intelligence & Machine Learning, and Internet of Things (IoT). Known for my problem-solving abilities and innovative mindset, I aim to contribute to real-world challenges by developing secure, efficient, and scalable digital solutions. As a Grand Finalist in Smart India Hackathon-2024, I possess hands-on experience in post-quantum cryptography and have a keen interest in exploring emerging technologies to safeguard the future of digital ecosystems.

EXPERIENCE

Altruisty, Chennai

October,2024 – December,2024

AI & ML Intern

Worked on the development of an AI-based Product Description Generator, utilizing Seq-to-Seq models, LSTM networks, and other Deep Learning techniques.

- Involved in training and defining models, focusing on architecture design, parameter tuning, and optimizing performance for accurate text generation.
- Led efforts in data cleaning, data preprocessing, and feature engineering to prepare datasets for model training.
- Utilized frameworks like TensorFlow, Keras, and scikit-learn for building, training, and evaluating machine learning and NLP models.
- Improved the model's efficiency and scalability by optimizing training pipelines and automating key processes.

ACHIEVEMENTS

Grand Finalist, Smart India Hackathon, 2024

Led IoTEnigma as Team Leader and developed innovative solutions For IoT devices in the field of Post-Quantum Cryptography, aiming to enhance cybersecurity for next-generation digital ecosystems.

PROJECTS

SecureSME Project

Currently planning the development of SecureSME, aimed at securing Small and Medium Enterprises (SMEs) from Post-Quantum attacks (To Be Developed As A Startup).

Automated Parking System with IoT Integration

Designed and developed an automated parking system using IoT devices for efficient parking space management.
