📄 EXECUTIVE SUMMARY

I am a detail-oriented and technically proficient **Computer Science undergraduate** with a strong foundation in **software engineering, machine learning, and full-stack development**. Seeking an **internship opportunity** to contribute to innovative, real-world technology solutions by leveraging my expertise in **algorithm design, AI systems, and data-driven development**. Committed to continuous learning, delivering **high-impact contributions**, and collaborating within **agile, cross-functional teams** to drive organizational growth and technical excellence.

🧠 SKILLS

Technical Skills :

- **Languages:** Python, Java
- **Web:** HTML, CSS, JavaScript
- **Databases:** MySQL, SQL
- **Frameworks/Tools:** GitHub, Flask

🎓 EDUCATION

Sri Venkateswara College of Engineering

Bachelor of Engineering

Computer Science Enginerring

2023 – 2027

CGPA : 8.401

Chettinad Vidyashram

Computer Science Stream

2021 – 2023

Grade : 89%

👛 PROFESSIONAL EXPERIENCE

Teachnook

AI Intern

Jul 2022 – Sep 2022

Developed a **sentiment analysis application** using the **IMDB movie dataset** involved **extracting insights** from the data to understand perceptions and trends.

📁 PROJECTS

Deepfake Detection Tool 🔗

Tools and Technology : Python, Keras, OpenCV

Aug 2024 – Sep 2024

- Developed a tool to **identify AI-manipulated video frames** using CNN and face landmark detection with an accuracy of **92.4%**.
- Processed large video datasets and implemented **real-time video analysis**.
- Integrated user interface for result visualization and reporting.

AI-Based Car Part Labeling System 🔗

Tools and Technology : Python, OpenCV, TensorFlow

Feb 2025 – Mar 2025

- Built an intelligent **labeling system** for **automotive parts** using image recognition and CNNs.
- Enabled **real-time object detection and classification** from video feeds.
- Achieved over **90% accuracy** on test data with optimized preprocessing.

Railway Ticket Booking System – ChukChukGO 🔗

Tools and Technology : Java, SQL, HTML/CSS/JS

Apr 2025 – May 2025

- Designed and developed a fully functional **booking system** for **railway tickets**.
- Implemented **user login, route selection, seat booking**, and admin **panel features**.
- Used Java for backend logic and MySQL for database handling.

📜 CERTIFICATES

- Artificial Intelligence 🔗
- Java 🔗

🧩 HACKATHONS

- SIH '24 - National Level Hackathon
- IGDC Road to Game Jam Contest - 2024
- GDSC 2025 - Hackathon
