 Chennai, Tamil Nadu, India

Profile Summary

Motivated Computer Science graduate student actively seeking internship opportunities. Strong analytical skills and diligent work ethic enable me to contribute effectively to business objectives. Eager to apply theoretical knowledge to practical projects and further develop expertise. Committed to delivering high-quality results and gaining valuable real-world experience.

Education

Sri Venkateswara College of Engineering2021 - 2025

Bachelor of Engineering in Computer Science

- UI-UX Associate of Google Developers Students Club SVCE
- Design Team Lead of Compete to Compute Club

Experience

Business Development InternAUG 2024 - NOV 2024

DOCSUMO

- Developed and executed business development strategies by exploring new online channels, optimizing outreach efforts, and enhancing client engagement to drive growth.
- Applied Governance, Risk, and Compliance (GRC) principles to business development activities, ensuring alignment with industry regulations and minimizing risks in client interactions and data handling.
- Leveraged data analysis and scraping techniques to identify prospects, optimize lead generation strategies, and ensure compliance with data protection standards.

Product Design InternOCT 2023 - FEB 2024

GRAB YOUR SEATS

- Designed user interfaces for admin and user web platforms.
- Contributed to the system design of GRAB YOUR SEATS.
- Played an integral role in developing and maintaining Product Requirements Document.

Projects

TASK SYNC

A ROBUST TASK MANAGEMENT APPLICATION

- Developed Task Sync, a task management app using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) to enhance team collaboration and productivity.
- Implemented secure user authentication with **JWT** and used **Postman** for API testing and validation.
- Designed a responsive UI with **React.js** and configured **MongoDB** for scalable data storage.

RESQ

FLOOD MANAGEMENT APP

- Developed a user-centric food inventory web application designed for flood relief efforts in Chennai, with roles such as Contributor, Requester, and NGO to streamline food donation and distribution. Conducted comprehensive research on food scarcity areas, user behavior, and stakeholder needs to inform the app's features and functionalities.
- Designed an intuitive UI/UX to enhance accessibility and engagement on the web platform and implemented backend solutions using **Node.js**, **Express.js**, and **MongoDB** for efficient data management and real-time tracking.
